INTRODUCTION

E-Book store means going to an app that has a lot of different kinds of books in different categories. This makes it easy for us to sit anywhere and buy any book we want to read. This also saves us a lot of time and gives us a lot of choices all in one place. This app also lets customers shop from anywhere by showing them a few pages of the book, which makes it easier for them to decide if they want to buy it or not. The Online Book Store's main goal is to make it easy for people to get books.
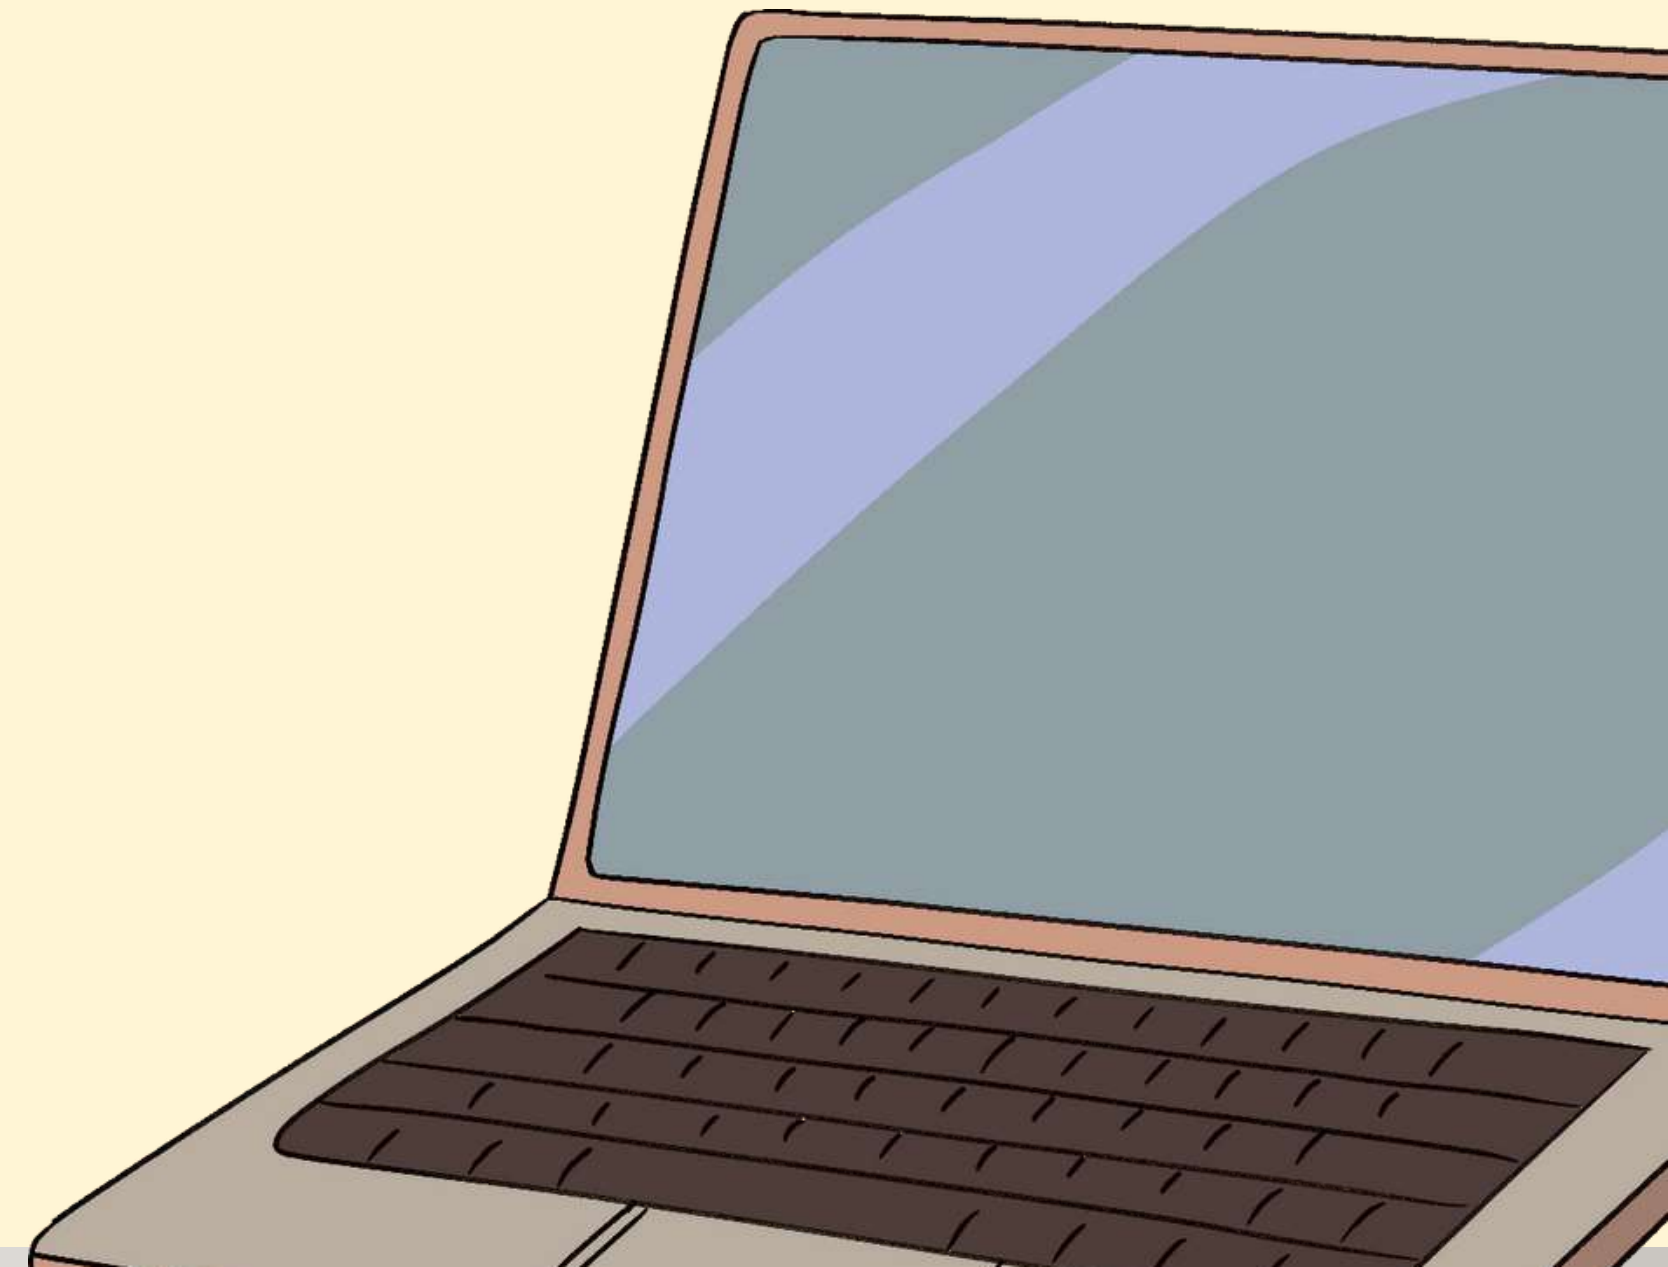

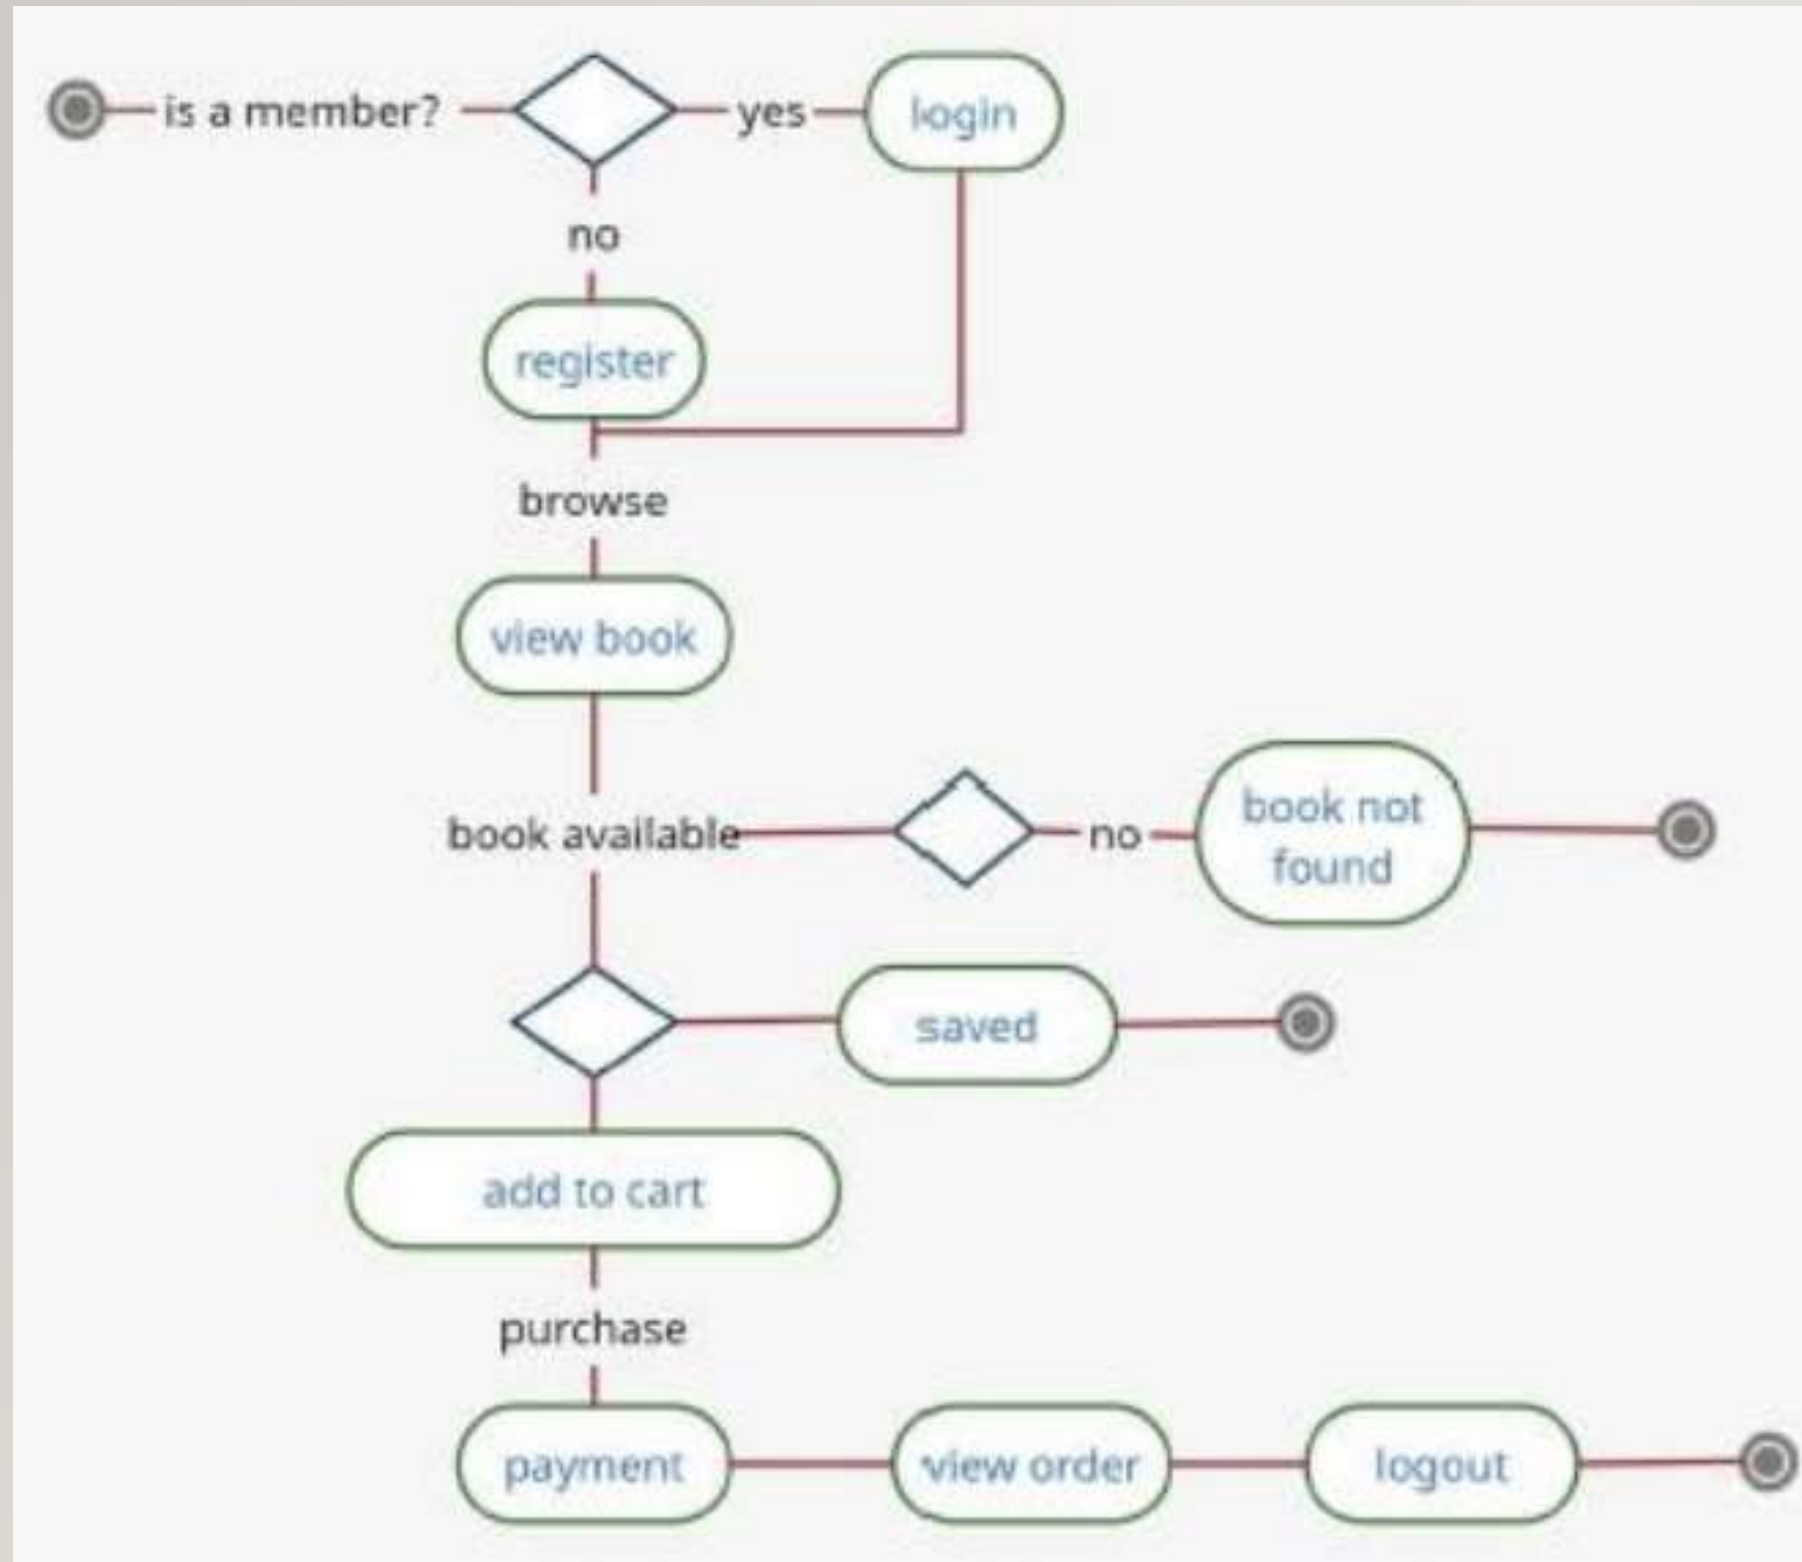

TECHNOLOGIES USED:

Flutter   version 2.2.3

Firebase

Adobe XD

ACTIVITY DIAGRAM:

• Activity Diagrams are what we turn to when we need to depict the flow of control in a particular system. We may also refer to the stages involved in the execution of a use case by using something called an activity diagram. Utilizing activity diagrams, we represent both sequential and concurrent activities. Consequently, activity diagrams are used to provide a graphical representation of operations. A flow condition and the order in which it occurs are the primary foci of attention in an activity diagram. We use something called an activity diagram to either explain or illustrate what causes a certain occurrence.

life for him. It was his escape, his refuge. Being sober hadn't got him anywhere, and being drunk obliterated the possibility.

He had tubes attached to needles, which dipped into his veins and arteries, and pumped liquids from transparent pouches hanging from the stand on his right side. He was sure his parents had no idea of his whereabouts. He knew none of his friends would have given the hospital authorities his parents' numbers or address. He was in no mood to see or talk to them. Not now, not ever.

The hands of the watch on his cell phone touched. It was twelve—fourteen hours since he had been admitted. Last night, like many before, had been a night of debauchery, porn, poker, alcohol and smoke. Six of his friends in his cramped one-room apartment —a five-minute walk from college—and a few bottles

CONCLUSION

The app is mainly focused on providing people with remote access for shopping.

It greatly saves the time.

This project helped us to learn new things and face new experiences.

To us, it seems that online retailers are the future and that the future is good.

Here we have given more advance software for E-Commerce Book Store including more facilities.

THANK YOU FOR YOUR PATIENCE
